So we have 5 Team Mack riders with a game plan to win and hopefully place all in top 5. But Saplis is there with his plan to win and the experience to make it work. Toss in Sneddon unrelenting pace pushing, Bolivar the unknown power and Jamin Widoff is sure to make his presence known. It was a great race, they all rode great.

### MASTER age 50-59 6-laps, 48.6 miles.

Most of the cream of 50+ racing came out to battle in the hills around West Lake Village. At least a few hundred years of combined racing experience in this field made it tactical and fast. The Photo finish was able to separate the very close sprint of the first few places in millimeters. "if the Del Mondo was on the front, I would have won". Could be, but 6 years ago Stern would have ridden away from all going up the hills, every hill, until you gave up and settle for 2<sup>nd</sup> place sprint. But this race was tough, a great group of riders pushed each other, trying to wear down, gain some distance, get an edge and in the end they sprinted with everything they had left.

Master Women and Masters 60 on up started together, Bob Burns (trains in Florida and Illinois which ever has the best weather) was the man to beat but it is tough with someone who cycles first then fills in the day. This course was probably no strain on Dennis Novak legs being from the mega hilly Madison area, (doing hill repeats around Baraboo?) With the guys wondering who will push the pace, there is Marilyn (lady of mystery, hitman, investigator, lawyer, some exciting contract), your either on her wheel or you're dropped. Pat Beam misses the Senior Olympics Swim meet to race her bike. "Can I ride one more Lap" Pat Murphy wins 75+ then rides with Jake "look at all the geese" Krehbiel. (you can ride as many laps as you want Pat but I am leaving by 6pm.) Joking aside the race started at a nice warm-up pace then proceeded into a competition of who had the leg power and lungs to get away or at least drop some of the riders (the field did split in two) without blowing up.
