TWO PERSON "40k" TEAM TIME TRIAL
 Saturday May 9, 2009
 Garden Prairie, IL

MATTS
MID AMERICA TIME TRIAL SERIES
RESULTS

Heavy overcast skies, will it rain or not, a stiff breeze of upwards 20mph out of the northwestern farm fields made the temps feel like 50. But no rain, clouds were breaking up and warming temps made the wind feel like climbing a hill for miles on end, when oh when do we turn. The longest straight section was directly into the wind.

Most of the course was in great shape for riding. Two original course roads we had to avoid because of too many potholes. Thanks to Jerry, Pat and Gerald for the heads up in the weeks and days before event. The County did patch half the holes the day before but too many monsters remained so a switch was made to a recently paved road used years ago. I expect the county will fill the monsters before the next event at Garden Prairie.

With the wind blasting and gusting, it made drafting your partner a battle with the wind to avoid running over the rear wheel. Where is that draft behind this aerodynamic teammate? Obviously some did not have much difficulty:

- 51:33 by Master 55-59 Doughty and Watkins. Tom has been burning courses for years, Stan? not sure but he is fast.
- 52:58 by Cat 1-2 Rosenfield and Harris. Isn't Scott the JR who flatted twice in heavy rain last year before finishing 40K?
- 53:03 by Master 40-49 Oliff and Michaels. I thought Jeff only races track?
- 53:33 by Master 50-54 Jones and Host, two masters of TT & nutrition, Doc and the World Master Pursuit Silver winner.

I just knew this Team was going to ride fast when I saw the start sheet.

- 58:17 by Women Open Thompson and Dust both relatively knew to TT, Leigh is Nat Champ & Debbie is a race veteran.
- 60:00 by Women Open Ploeg and Claus.
- 65:57 by Women Cat 4 Neville and Storgbauer

This was a TEAM race, you work TOGETHER, to ride a fast time. I know it feels good to drop another rider, but in a team time trial the stronger rider HELPS the TEAMMATE. This could be taking longer pulls, leading into the wind, sitting up to give more suction for your teammate or screaming loud enough in the last 200 meters that your teammate cannot hear the pain of lungs bursting and muscles tearing down. The finish time was taken when the 2nd riders front wheel crossed the finish line.
