

Come out and Join Us! Race, spectate, and learn about this paradigm shift in transportation reality. Admission is free for spectators. For registration and further details, see below.

Oregon Human Powered Vehicles

Proudly Announces

Human Power Challenge 2010

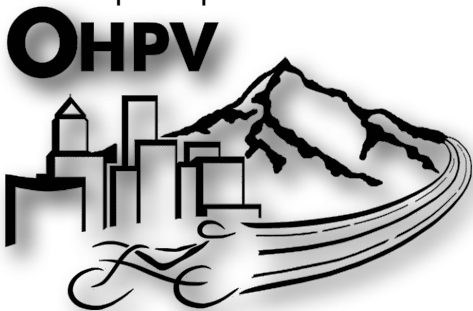

Portland International Raceway

Memorial Day Weekend May 29 – 31

Human Power Challenge: Open to all types of Human Powered Vehicles (recumbent or upright). Race at a venue that tests a rider in several disciplines: Road Racing, Time Trials, Drag Racing, Auto Cross, Short Track, and 200 Meter Flying Sprint. Social activities and exhibits of the latest in “bent” technology abound all during the weekend.

Left Coast Velomobile Gathering: Annual velomobile extravaganza! Velomobiles are a human powered vehicle that aerodynamically encloses the rider/bike, shielding them from weather while enhancing speed at the same time. Velo specific rides, exhibitions for the spectators, and a symposium for all who want to know more about these marvels of transportation are all part of the action packed weekend at PIR.

ePower Challenge: Another year of the ground breaking electric assist bike race. Last year’s race was the first ever e-assist bike race in the U.S.A. There will be several races to compete in. From commercial models to home brew bikes, all are welcome to participate and celebrate this forefront technology.
